

Dear Colleagues,

It is our pleasure to extend to you an invitation to contribute to an upcoming edited book to be published by Springer in the *Geographies of Tourism and Global Change* book series (indexed in Scopus). The proposed title of the contributed book is:

*From Circular Economy to Regenerative Tourism:
Pathways for Sustainable Development*

This edited monograph aims to investigate regenerative tourism as a transformative model within the broader framework of sustainable development. A goal is to offer a detailed exploration of how circular economy principles can integrate into tourism practices, focusing on fostering environmental, social, and economic resilience. The book expands its discussion to include green skills and practices in the hospitality and tourism sectors, as well as eco-tourism's potential to revitalize rural areas. By addressing these emerging trends, the monograph is dedicated to provide actionable insights for advancing inclusive and sustainable tourism systems across diverse regions.

Designed as a multidisciplinary resource, the book will explore the interconnected roles of waste management, energy efficiency, water conservation, and eco-tourism initiatives in creating tourism systems that support economic growth while preserving environmental and cultural heritage. By integrating the SDG-aligned principles highlighted in tourism sustainability research, this work will position regenerative tourism as a pivotal mechanism for fostering social equity, enhancing biodiversity conservation, and driving rural revitalization.

The list of potential subjects within the series encompasses, but is not limited to:

- *Theoretical foundations of regenerative tourism*
- *Circular economy innovations in tourism*
- *Green skills and practices in hospitality and tourism*
- *Resilience, connectivity, and sustainable tourism networks*
- *Spatial and econometric modelling in regenerative tourism*
- *Governance and policy for regenerative tourism*
- *Eco-tourism in rural and sensitive areas*
- *Socio-economic and environmental impacts of regenerative tourism*
- *Green innovations in rural hospitality and agritourism*
- *Regional perspectives and case studies*
- *Future directions for regenerative tourism*

As a part of our ongoing **CROSS-REIS project** it will be hosted a special project session *Regenerative Tourism: Exploring Sustainable Tourism Practices and Principles* at the forthcoming conference Montenegrin International Conference on Economics & Business - MICEB 2025, to be held on May 29-31, 2025 in Budva, Montenegro. I kindly invite you to prepare a presentation of the proposed book contribution for this session (optional/online), wherein you can share your insights, research findings, and perspectives on the topic.

CROSS-disciplinary network for research excellence in Regenerative Economy Innovation eco-Systems

www.crossreis.com | crossreis.project@eknfak.ni.ac.rs

We are pleased to announce that this book will be provided **open access** for all chapters, generously funded by the CROSS-REIS project.

If you are interested in contributing, we kindly invite you to submit a title and a concise abstract (up to 250 words) of your proposed chapter by **March 1, 2025**. This will enable us to initiate the book preparation process in a timely manner.

Please note that the deadline for the submission of full papers is **May 31, 2025**, allowing sufficient time for further research and refinement of your contribution. The book is scheduled for publication by **December 31, 2025**. Detailed author guidelines and submission instructions will be provided in due course.

All chapters will undergo a rigorous peer-review process to ensure the highest academic standards and quality.

Submissions should be sent to springerbook@crossreis.com or miceb@ucg.ac.me (with note in Subject of e-mail: "For Springer book").

We also encourage you to share this call for contributions with colleagues and networks who may be interested in participating.

Thank you for considering this opportunity. I look forward to your valued contributions and to working together in shaping the discourse on regenerative tourism.

Warm regards,

Editors
